Melting Power

50 LB NET WT. (22.68 kg)

Commercial Granular Deicer

People Helping People Improve Their Environment

Ice Slicer Clear

Contains a powerful blend of four naturally occurring chlorides. The combination of Calcium, Magnesium, Sodium and Potassium chlorides result in a superior performing deicer. Because of its effectiveness, the rate of application is greatly reduced, which is safer for use around concrete, asphalt, metal, children, animals and vegetation, all while saving money!

Ice Slicer Clear is an all natural deicer that has uniform gradation of coarse and fine material to provide faster and longer lasting performance.

Benefits

- * Commercial grade bagged granular deicer with no tracking issues
- * Naturally occurring complex blend of four chlorides means superior performance with lower application rates
- * Less corrosive
- * Naturally eco-friendly, vegetation safe
- * No dyes or additives
- * Safer for pets & children

DISTRIBUTED BY:

HIGH PERFORMANCE

Contains Magnesium, Calcium, Potassium
and Sodium Chloride

ENVIRONMENTALLY SAFER

Safer for Vegetation, Animals and Humans

LESS CORROSIVE

Third party testing indicates Ice Slicer Clear
is 39% less corrosive than standard white
salt

Unique Color Enhances Performance

The unique color of Ice Slicer Clear serves as a guide to where and how much has been applied. Usage is generally half as much and half as often as compared with other deicers. The peach color absorbs heat from the sun, accelerating the melting process.

ICE SLICER CLEAR

HIGH PERFORMANCE

Contains Magnesium, Calcium, Potassium and Sodium Chloride

ENVIRONMENTALLY SAFER

Safer for Vegetation, Animals and Humans

LESS CORROSIVE

ICE SLICER CLEAR

Contains a powerful four-way blend of naturally occurring magnesium, calcium, potassium, and sodium chloride in a granular ice-melt form, resulting in a high-performance ice-melt safer for use around concrete, asphalt, metal, animals and vegetation. Ice Slicer Clear is an all-natural ice-melt that contains an even mix of finer and coarser materials to promote faster and steady ice melting.

DIRECTIONS FOR USE

For best results, remove any existing loose snow and slush from driveways, steps and walkways prior to application of ice-melt. Evenly sprinkle Ice Slicer Clear on desired surfaces. Melting should begin immediately. Once snow and ice have sufficiently melted, shovel off slush. Thick accumulations may require additional application. Ice Slicer Clear may also be kept in cars and trucks for use any time when traction is needed.

CONTAINS

Unique blend of granular ice-melt

Contains: CAS. NO.

NaCl..... 007647-14-5

MgCl2..... 007786-30-3

CaCl2..... 007440-70-2

KCl..... 007440-09-7

UNIQUE COLOR

ENHANCES PERFORMANCE

The unique color of Ice Slicer Clear serves as a guide to where and how much has been applied. Usage is generally half as much and half as often as compared with other de-icers. The peach color absorbs heat.

NOTICE

Do not use on concrete that is less than one year old, or that was not properly mixed, finished, or cured. Flaking or spalling may occur when using any ice-melting product on concrete surfaces, especially those that are poorly constructed, contain porous concrete or act as a mortar joints between bricks and flagstone. When used in these situations, Ice Slicer Clear should cause less damage than most other de-icers and will reduce the number of concrete freeze/thaw cycles, which also greatly contributes to concrete damage.

FIRST AID

Prolonged skin contact may cause irritation. Wash thoroughly with water. In case of eye contact, flush with water for 15 minutes. If irritation persists, consult medical personnel. If swallowed, drink water and consult with medical personnel.

Disclaimer: no warranty, expressed or implied, including but not limited to warranty of merchantability or fitness for a particular purpose, is made concerning this product. If product sets up or becomes hard, simply roll the bag on the ground to loosen up material.
